

Addendum No. 1

Invitation to Tender ES-18-14 Caretaker Services – Bear Lake, McLeod Lake and Summit Lake Regional Transfer Stations

The addendum is being issued prior to the closing of the Tender to provide further information, make changes to, or to clarify the Contract Documents and is to be read, interpreted and coordinated with all other parts of the Contract Documents. In the case of a conflict with the balance of the documents, this Addendum shall govern. **Tenderers shall attach a signed copy of this addendum to their Tender.** This addendum shall form part of the Contract Documents.

Change to Operational Specifications, Section 8. SNOW REMOVAL AND SANDING, on page 29:

“The Contractor will keep the following areas free and clear of snow and ice accumulations and will provide and apply pedestrian traction material and de-icing material as required to maintain user safety:

- within a 10 metre radius of the transfer bin doors used by the public;
- within a 3 metre radius of any access point to designated receiving areas within the Marshalling Area;
- within a 3 metre radius of footings located at the base of the bins;
- within a 3 metre radius of blue multi-material bin; and
- chain link gates in the open and closed positions to be shovelled and kept free of snow accumulation for ease of use.

The General Manager must approve, in advance, the de-icing and traction material product to be used.

The Regional District will maintain all Roads.”

Shall be changed to read:

“The Contractor will keep the following areas free and clear of snow and ice accumulations and will provide and apply pedestrian traction material and de-icing material as required to maintain user safety:

At the Bear Lake and Summit Lake Regional Transfer Stations

- within a 10 metre radius of the transfer bin doors used by the public;
- within a 10 metre radius of any access point to designated receiving areas within the Marshalling Area;
- within a 3 metre radius of footings located at the base of the bins; and
- within a 10 metre radius of blue multi-material bin at Bear Lake (if applicable).

At the McLeod Lake Regional Transfer Station

- within a 15 metre radius of the transfer bin doors used by the public;
- within a 15 metre radius of any access point to designated receiving areas; and
- within a 3 metre radius of footings located at the base of the bins.

All chain link gates in the open and closed positions are to be shovelled and kept free of snow accumulation for ease of use.

The General Manager must approve, in advance, the de-icing and traction material product to be used.

The Regional District will maintain all Roads.”

Date: October 23, 2018

Addendum 1 Received.
